

# Hydraulic Integrated Circuits

# Seal Concept GmbH and Hydraulic Integrated Circuits

## Hydraulic Solutions – Precise, Innovative, Reliable

We provide custom hydraulic integrated Circuits for up to 700 bar and 400 l/min, made from steel, cast iron, or aluminum. Replacement designs for discontinued hydraulic control blocks are also available.

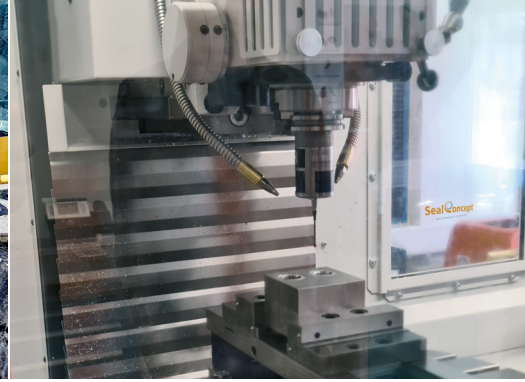

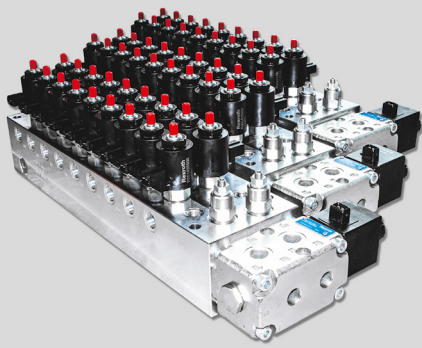

With our in-house CNC production, we develop tailored solutions – from prototypes to small series. Our field service offers on-site consultation, while project planning, assembly, and test runs are handled in-house.

Benefit from fast, expert advice and cost-effective solutions for your hydraulic applications.

### Product Benefits & Highlights at a Glance

- Hydraulic Integrated Circuits for up to 700 bar working pressure and a flow rate of up to 400 l/min made from steel, cast iron or aluminum
- Replacement designs for discontinued control blocks
- On-site consultation provided by our field service team
- Project planning, documentation, assembly, and test bench operation in-house
- Timely and cost-effective solutions for specialized hydraulic applications
- Customized designs for specific applications and solutions
- Fast and expert consultation
- In-house CNC machine for prototypes and small series

## Hydraulic Control Blocks

### We refine power

We specialize in advanced control solutions for hydraulic systems. We also develop custom replacement designs for discontinued hydraulic control blocks, tailored to your specific needs.

## Ordering control blocks from Seal Concept GmbH is that simple

**You** provide us with your hydraulic requirements.

**We** will clarify the technical details with you, design, and deliver ready-to-install hydraulic control blocks.

### What else do we offer:

- Valves for mobile and industrial applications
- Custom Compact Power Units
- Sealing technology – custom and standard seals
- Over 15.000 seal sizes ex stock available for immediate deliveries
- Expert hydraulic consulting from Seal Concept GmbH

**Test us!**
