# Seals for Hydraulic and Industry

## Product Benefits & Highlights at a Glance

- High stock availability of over 15,000 different items and dimensions
- Standard seals in common materials available from stock
- Competent advice and fast deliveries
- Quality management according to DIN EN ISO 9001:2015
- Environmental management certified according to DIN EN ISO 14001:2015
- We use high-quality materials and components

## We set standards

New Technologies

Innovative Materials

Customized Solution Concepts for

Seals & Hydraulic Components

## CNC machined Seals

### Quality products made to measure

If your machine is one of a kind, its seal should be too. Seal Concept manufactures prototypes and small series seals according to your individual specifications. You tell us which material and dimensions you need for your requirements and our experts will manufacture the right seal on modern precision machines.

The most common semi-finished materials - up to a size of Ø 720 mm - are always in stock with us. We also offer seals up to a diameter of 2.000 mm. Upon request, we will accompany you with our know-how from the planning phase to the implementation of your project.

- Custom Manufacturing of Special Seals up to Ø 720 mm with short delivery times
- Cutting-edge CNC machinery and 2-shift operation ensure top-quality service
- Extended service life and high durability (up to 700 bar) through advanced geometries and specialized materials
- Development, planning, design, and production of custom seals
- We manufacture special seals for various industries, including:  
Food industry, filling systems, motorsport, research, and more
- Use of high-performance sealing materials such as FDA-compliant compounds, Red Super Polymer and others
- Compliance with numerous national and international food regulations

#### What else do we offer:

Valves for Mobile and Industrial Applications  
Compact Power Modules Assembly  
Consulting Expertise of Seal Concept's Hydraulic Experts
